

TRANSAIR IGNIFUGO

CHARACTERISTICS

Tube made from flexible PVC with rigid spiral, practically non deformable and anti-choke.
The inner surface is smooth while the exterior one is corrugated.
Great flexibility (bending radius equal to interior diameter) and lightness.
Resistant to impacts, atmospheric agents, to smoke and to a wide range of chemical products.
Self extinguishing from fire according to the norm UL94 HO
Temperature range between -15°C and 65°C

USAGE

Aspiration and impulsion of fumes, shavings, seeds, textile fibres, etc, where protection from fire is necessary.
Industrial aspiration and ventilation
